

AI Study Mentor – SDG 4: Quality Education

1. Project Title:

AI Study Mentor – An Educational Chatbot for Quality Education

2. Project Objective & Description

Objective:

The objective of this project is to develop an AI-powered educational chatbot that helps students learn and understand concepts related to Artificial Intelligence, Python, Machine Learning, Deep Learning, and Natural Language Processing (NLP).

Description:

AI Study Mentor is a chatbot developed using Botpress that provides instant educational assistance to students. The chatbot answers academic questions, explains technical concepts, offers study tips, and recommends learning resources. The project supports SDG 4 (Quality Education) by making educational support accessible anytime and anywhere.

3. Technologies Used

Botpress:

Used as the primary chatbot development platform to design and deploy the conversational AI system.

Artificial Intelligence (AI):

Enables intelligent interaction between users and the chatbot.

Natural Language Processing (NLP):

Helps the chatbot understand and respond to user queries in natural language.

Knowledge Base:

Stores educational content related to AI, Python, Machine Learning, Deep Learning, and NLP.

GitHub:

Used to host and manage the project repository and documentation.

4. Screenshots with Explanation

Screenshot 1: Project Dashboard

Explanation:

Shows the AI Study Mentor chatbot project created in Botpress Studio.

Screenshot 2: Workflow Design

Explanation:

Displays the chatbot workflow containing the Start Node and Autonomous Node.

Screenshot 3: Knowledge Base

Explanation:

Shows the educational content added to the chatbot knowledge base.

Screenshot 4: Artificial Intelligence Response

Explanation:

Demonstrates the chatbot answering a question related to Artificial Intelligence.

Screenshot 5: Machine Learning Response

Explanation:

Shows the chatbot explaining Machine Learning concepts.

Screenshot 7: Study Tips Response

Explanation:

Shows the chatbot providing educational study recommendations.

Screenshot 8: Published Bot

Explanation:

Displays the successfully published AI Study Mentor chatbot.

6. Conclusion & Summary

The AI Study Mentor chatbot was developed to support SDG 4: Quality Education by providing students with instant educational assistance. Using Botpress, AI, and NLP technologies, the chatbot can answer questions, explain concepts, and provide study guidance. Through this project, practical experience was gained in chatbot development, knowledge base management, conversational AI design, and educational technology. The project demonstrates how AI can improve learning accessibility and support students in their educational journey.
